AI & Generative AI: Generative AI, Prompt Engineering, AI-Assisted Content Creation, AI-Powered Marketing, AI-Based Personalization, ChatGPT, Gemini, Microsoft Copilot, Perplexity

Digital Marketing: SEO, Social Media Marketing, Content Marketing, Email Marketing, Keyword Research, Content Strategy, Communication

Certification

HubSpot Academy – Digital Marketing Certified · valid Sep 29, 2026 – Oct 28, 2028 · Certification code f9954e2e7fca4e9a8715f05273e45408

All projects are portfolio and concept work. Plans, keywords and creatives are proposals; no live campaign results are claimed.

PROJECT 1

Visnal Group – Digital Marketing Strategy

A full-funnel digital marketing plan for a UAE pre-engineered and hot-rolled steel building company (Indus Metal L.L.C.), aimed at B2B decision-makers in industrial and construction. It covers audience, channels, content, ads, landing page and measurement.

Tools: **LinkedIn** · **Instagram** · **Facebook** · **YouTube** · **Google Ads** · **SEO**

My role: Sole author. Audience analysis, channel strategy, content calendar, ad and post copy, landing-page concept and measurement plan.

Key takeaway: One message carried across channels, with a clear next step at every stage, from awareness to a quote request.

Objectives and audience

- **Objectives:** build awareness, showcase expertise, generate leads, support sales (Awareness → Interest → Enquiry → Sales follow-up).
- **Audiences:** factory owners, warehouse developers, contractors and industrial businesses, each with tailored messaging.

Digital customer journey

Social media strategy

LinkedIn for B2B credibility and lead generation, Instagram for visual project showcase, Facebook for awareness and community, YouTube for process and project videos. Proposed content mix:

Projects 40%	Education 25%	Process 20%	Lead Gen 15%
--------------	---------------	-------------	--------------

30-day content plan

Week 1 · Brand	Week 2 · Expertise	Week 3 · Projects	Week 4 · Conversion
Company and PEB introduction	Engineering and manufacturing	Warehouse and factory projects	Benefits and Request a Quote

Weekly rhythm: Mon Educational · Wed Project · Fri Company/Process · Sun Lead Generation

Campaign assets

Sample creatives designed for the plan: an Instagram awareness post and a LinkedIn B2B post, both ending in a Request a Quote call to action. No savings or completion-time claims are made.

Visnal Group
Pre-Engineered & Hot-Rolled Steel Buildings

From Design to Erection — One Complete Steel Building Solution

A successful steel-building project involves more than fabrication. Engineering, planning, assembly, welding, surface preparation and painting all form part of the workflow.

Planning a new industrial facility? Let's discuss your project requirements.

Pre-Engineered Steel Buildings in UAE | Visnal Group

Explore pre-engineered and hot-rolled steel building solutions for factories, warehouses and industrial facilities.

Campaign: PEB UAE Lead Generation
Objective: Leads
Audience: UAE industrial and construction decision-makers
CTA: Request a Quote
Primary keyword: pre-engineered steel buildings UAE

Landing page wireframe, Google Ads text ad and proposed page title and meta description. Keywords are proposed, not current rankings.

How success would be measured

Awareness	Engagement	Leads	Conversion
Reach, impressions, website traffic	Engagement rate, likes, comments, shares	Enquiries, quote requests, form submissions	Qualified leads, sales follow-ups, lead to customer

PROJECT 2

UAE Steel Industry – SEO Strategy

Keyword research and an SEO plan for a UAE steel company, built from Google Trends data (UAE, web search, past 12 months). It connects search intent to specific pages and content, with a focus on delivery-related searches.

Tools: **Google Trends** · **Keyword Research** · **On-Page SEO** · **Local SEO**

My role: Sole author. Keyword research, search-intent mapping, on-page and technical SEO plan, KPI selection.

Key takeaway: Google Trends shows relative interest, not search volume, so final keywords need a volume tool and business-relevance checks.

Keyword groups

Group	Example keywords	Use
General	steel supplier, steel distributor, steel company, steel trading	Broad SEO content
Location	steel supplier UAE / Dubai / Ajman / Sharjah	Emirate-level targeting
Delivery	steel delivery, steel delivery UAE, steel delivery tracking, fast steel delivery	Delivery-intent pages

Google Trends evidence

Relative interest (0–100), not exact search volume. Sparse lines mean limited data for that comparison, not zero searches.

Search intent mapped to pages

Keyword	Intent	Recommended page
steel supplier	Commercial	Homepage / supplier page
steel supplier UAE	Commercial + local	UAE landing page
steel supplier Dubai	Local + commercial	Dubai location page
steel delivery UAE	Commercial	Delivery service page
steel delivery tracking	Informational / transactional	Delivery tracking page

Delivery tracking page and SEO plan

Steel Delivery Tracking | UAE

Order ID	STL-10245
Status	In Transit
Expected Delivery	08 October 2026
Current Location	Dubai

Track Order
Contact Support

Sample delivery tracking page

A page built to match delivery-related search intent while improving customer communication. Title, order ID, status, expected delivery and current location are shown, with a clear contact action.

SEO KPIs

Organic traffic, keyword rankings, impressions, CTR, leads and enquiries, conversion rate, backlinks.

On-page, technical and content plan

- On-page:** keyword-led page titles and meta descriptions, clear H1–H3 structure, descriptive image ALT text, internal links between supplier, product and delivery pages.
- Technical:** mobile-friendly and fast pages, HTTPS, clean URLs, XML sitemap and robots.txt, broken-link fixes.
- Content:** articles such as "How to Choose a Reliable Steel Supplier in UAE" and "How Steel Delivery Tracking Can Reduce Project Delays", plus location pages for Dubai, Ajman and Sharjah.

PROJECT 3

Steel Project Delivery Tracker

A working prototype that keeps steel-project customers informed during delivery. The admin updates the stage or reports a delay with a revised ETA, the customer's tracking page updates, and a ready-to-send email is drafted. Built to cut "where is my material?" calls and protect trust during delays. Runs on sample data.

Tools: **Email notifications** · **Customer communication**

Live demo: <https://maria-123418.github.io/steel-delivery-tracker/> (tap the badge at the top to switch between admin and customer views)

My role: Designed and built the prototype, including the stage workflow and the notification wording.

Key takeaway: Telling customers early about a delay, with a reason and a revised date, protects trust better than silence.

Your Steel Components Are on the Way

Project	ABC Warehouse
Order Status	In Transit
Expected Delivery	5 October

Track Project Delivery

Delivery Update

Your steel-component delivery has been delayed due to an unforeseen transportation issue.

Original ETA	5 October
Revised ETA	7 October

We apologize for the inconvenience and will keep you updated.

Track Project Delivery

Sample notifications drafted by the tool: stage update and delay.
